INTERNSHIPS

Software Development - Xebia

June 2026 - Present

Remote

- Developed and deployed **3 full-stack projects** following Agile methodologies.
- Leveraged **Azure cloud concepts (AZ-304)**, GitHub Copilot, and ChatGPT to accelerate development, debugging, and application optimization.
- Engineered responsive web interfaces with React.js and Tailwind CSS, improving UI consistency and component reusability.

Frontend Developer - Codexintern

July 2025 - August 2025

Remote

- Built 12+ responsive pages using React.js, JavaScript, and Tailwind CSS.
- Integrated 8+ REST APIs and developed reusable UI components.
- Resolved 20+ UI and responsiveness issues through testing and debugging.

Data Analyst - Imarticus

June 2025 - July 2025

New Delhi

- Analyzed datasets containing 10,000+ records using SQL, Python, Pandas, and Matplotlib to identify trends and generate actionable business insights.
- Performed data cleaning, EDA, and transformation for accurate reporting.
- Built 5+ dashboards using Power BI and Tableau to visualize KPIs.

PROJECTS

EcoPackAI – Plastic Packaging Impact Analyzer *React.js, Node.js, MongoDB, Gemini Vision API* [\(View\)](#)

- Built an AI-powered sustainability platform to analyze 50+ packaging materials using Gemini Vision API.
- Generated sustainability scores and eco-friendly recommendations through AI-driven packaging classification.
- Developed an interactive dashboard enabling users to compare products and make informed purchasing decisions.

Student Management System *HTML, CSS, Javascript, Node.js, Express.js, MongoDB* [\(View\)](#)

- Developed a full-stack platform to manage 500+ student records with secure authentication and role-based access.
- Implemented CRUD operations and REST APIs, reducing manual record management effort significantly.
- Designed responsive dashboards for attendance, academic records, and real-time student data access.

FreshTrackAI *React.js, Node.js, MongoDB, Gemini API, OCR* [\(View\)](#)

- Built an AI-powered food inventory platform that automates expiry tracking through OCR-based product scanning.
- Developed intelligent expiry alerts and freshness monitoring to help users reduce food waste and improve inventory management.
- Integrated Gemini API to generate personalized recipe recommendations using available ingredients.

SKILLS

- **Frontend:** HTML5, CSS3, JavaScript, React.js, TypeScript
- **Backend & Programming:** Node.js, Java, C++
- **Data & Tools:** Power BI, EDA, Python, MySQL
- **Version Control & Design:** Git, GitHub, Figma

CERTIFICATIONS

- Introduction to Front-End Development - Meta
- Web Development in Node.js: Build Your First Website - Coursera Project Network

EDUCATION

B.Tech in Computer Science, Bennett University

2023 - 2027

ACHIEVEMENTS

- Secured **Top 15** position in a national-level hackathon, presenting the final solution at Microsoft Office.
- Participated in **Google Girl Hackathon** and **Google Solution Challenge**, developing innovative solutions for real-world problems.
- Completed **Deloitte Australia Technology Job Simulation (Forage)**, contributing to dashboard design and software development tasks.
